

PIPENET[®]

Leading The Way in Fluid Flow Analysis

PIPENET[®] Vision 1.9.0 Release

Welcome to PIPENET[®] VISION 1.9.0!

The latest evolution of PIPENET[®], PIPENET Vision 1.9.0 has more than 100 enhancements including templates, an improved graph viewer and a streamlined user interface. There are many significant improvements that will revolutionise the PIPENET experience. Here is a summary of the new features - see the Help and PDF manuals for further information. We are sure you will enjoy the outstanding capabilities of PIPENET Vision 1.9.0.

PIPENET Vision 1.9.0 Transient Module Enhancements include...

- Reference elevation is available.
- Pressure and head envelope can be plotted in Excel spreadsheet.
- Graph smart output is improved to reduce the recorded data.
- Calculation dialog redesigned.
- Improved Graph Viewer.
 - New quick and easy to use colour picker.
 - Improved tool-tips.
 - Improved speed.
 - User editable zoom boxes.
 - Ribbon reorganised into "Home", "Graph" and "Tools" tabs.
 - "Remove All Graphs" and "Hide Grid Lines"
 - Dynamic change of decimal places on x-axis.
- Added ability to reverse multiple pipes simultaneously.
- Recent files now grouped into a submenu.
- New templates functionality.
- New look user interface.
- Added component description to properties window.

PIPENET Vision 1.9.0 Spray/Sprinkler Module Enhancements include...

- An increased maximum number of pipe types and pipe schedules.
- An increased maximum number of all components.
- Pressure at orifice calculation added.

PIPENET Leading The Way in Fluid Flow Analysis

- Added ability to reverse multiple pipes simultaneously.
- Recent files now grouped into a submenu.
- New templates functionality.
- Improved pipe sizing calculation.
- New look user interface.
- Added component description to properties window.

PIPENET Vision 1.9.0 Standard Module Enhancements include...

- Pressure at orifice calculation added.
- Ambient pressure correction calculation improved.
- An increased maximum number of pipe types and pipe schedules.
- An increased maximum number of all components.
- Added ability to reverse multiple pipes simultaneously.
- Recent files now grouped into a submenu.
- New templates functionality.
- Improved pipe sizing calculation.
- New look user interface.
- Added component description to properties window.

There are many user interface enhancements in all modules. Please see our User and Training Manuals for Further information.
